

Number Lines to cut apart and use for Lessons 1 and 2:

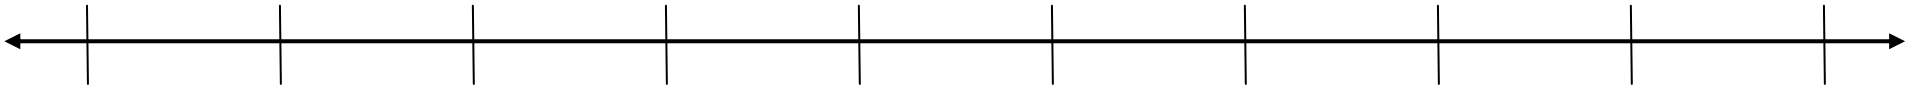

Name \_\_\_\_\_

Student Work Page – Lesson 3

We measured 2 \_\_\_\_\_.

Mine is \_\_\_\_\_ square tiles long. My buddy's is \_\_\_\_\_ square tiles long.

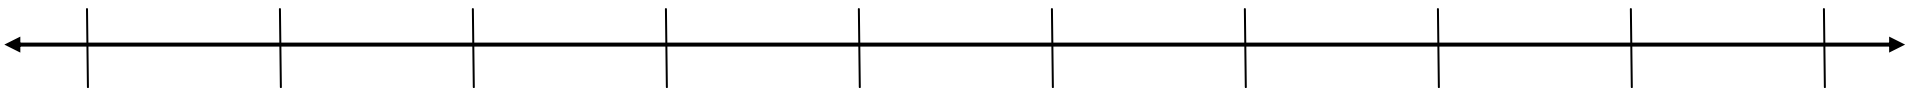

Together they are \_\_\_\_\_ square tiles long.

We measured 2 \_\_\_\_\_.

Mine is \_\_\_\_\_ square tiles long. My buddy's is \_\_\_\_\_ square tiles long.

Together they are \_\_\_\_\_ square tiles long.

Name \_\_\_\_\_

Student Work Page – Lesson 4

We measured 2 \_\_\_\_\_.

Mine is \_\_\_\_\_ square tiles long. My buddy's is \_\_\_\_\_ square tiles long.

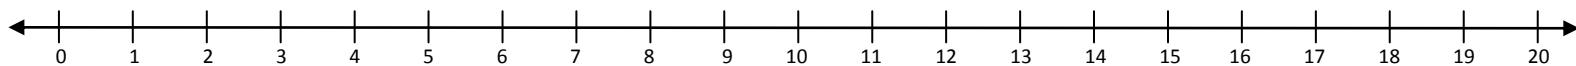

Together they are \_\_\_\_\_ square tiles long.

We measured 2 \_\_\_\_\_.

Mine is \_\_\_\_\_ square tiles long. My buddy's is \_\_\_\_\_ square tiles long.

Together they are \_\_\_\_\_ square tiles long.

Name \_\_\_\_\_

Student Work Page – Lesson 5

I have 2 pet snakes. One is 13 square tiles long. The other is 5 square tiles long. How long are they all together?

I have some pieces of rope. One piece is 8 square tiles long. The other is 6 square tiles long. How long are they all together?

My friend and I each have a licorice rope. Mine is 7 square tiles long. My friend's is 11 square tiles long. How long are they when we put them together?

I have 2 pencils. One is 10 square tiles long. I sharpened the other one and it is now 7 square tiles long. If I line them up, how long are they together?

Name \_\_\_\_\_

Student Work Page – Lesson 6

I have 2 sun flowers. One is 11 square tiles long. Together they are 15 square tiles long.  
How long is my other one?

I have 2 pieces of licorice rope. One piece is 6 square tiles long. When I put them together, they are 19 square tiles long. How long is my other piece?

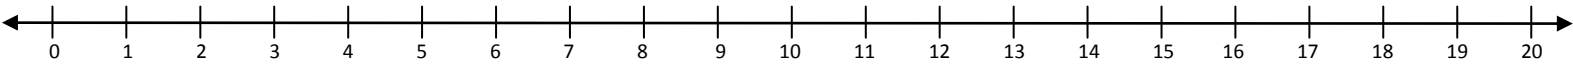

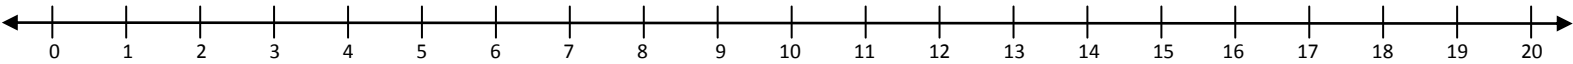

My mom and I each found a stick. My mom didn't measure hers. Mine is 5 square tiles long. When I lined them up and measured them, they were 17 square tiles long together. How long is my mom's stick?

My friend and I each have a pencil. Mine is 8 square tiles long. When I put them together, they are 19 square tiles long. How long is my friend's pencil?

Number lines for Lesson 7

Name \_\_\_\_\_

Student Work Page/Assessment – Lesson 8

I had a licorice rope. It was 17 square tiles long. I ate some of it. Now it's 6 square tiles long. How long was the part that I ate?

My friend and I each have a piece of rope. My piece is 11 square tiles long. When we put them together they are 19 square tiles long. How long is my friend's rope?

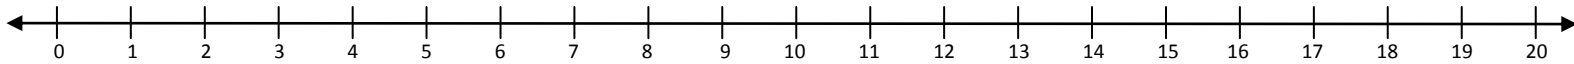

I have 2 pet snakes. One is 8 square tiles long. When I line them up together they are 15 square tiles long. How long is my other pet snake?

I have 2 pencils. When they are lines up together, they are 17 square tiles long. I gave one away to my friend. The one I have left is 8 square tiles long. How long was the one I gave away?

I have 2 pencils. One is 9 square tiles long. The other one is 6 square tiles long. How long are they together?

I have 2 pieces of licorice. One piece is 7 square tiles long. Together they are 13 square tiles long. How long is my other piece?
