

Alaska's College- and Career-Ready Commitment

The Economic Imperative

Today, nearly every good job requires some postsecondary education and/or training (e.g., an associate's or bachelor's degree, certificate, or apprenticeship or significant on-the-job training). All students need to be academically prepared to compete for good jobs in the global economy.

In 1950, 60% of jobs were classified as unskilled, attainable by young people with high school diplomas or less. Today, less than 20% jobs are considered to be unskilled.ⁱ

- **81%** of U.S. jobs are middle or high skills (jobs that require some postsecondary education or training).
- Yet only **37%** of Alaska's adults have some postsecondary degree (associate's or higher).ⁱⁱ

More education is associated with higher earnings and higher rates of employment in Alaska.ⁱⁱⁱ

Mean Income	Education Level	Unemployment
\$10,872	HS Dropout	19%
\$29,746	HS Graduate	11%
\$36,151	Some College	8%
\$60,189	Bachelors & Above	5%

The Equity Imperative

Far too many students drop out or graduate from high school unprepared for success, closing doors and limiting their options and opportunities – in particular minority and low-income students.

Alaska's achievement gaps begin in the earliest grades and extend through college enrollment and admissions.^{iv}

	All	White	Black	Hispanic	Low SES
4 th Grade Math Proficiency	37%	50%	15%	36%	22%
8 th Grade Reading Proficiency ^v	31%	42%	17%	24%	16%
HS Graduation Rate ^{vi}	69%	74%	64%	64%	N/A
College Completion Rate ^{vii}	22%	25%	21%	23%	N/A

The Expectations Gap

The bar has been set too low for too long, keeping students from reaching their full potential. If we want students to achieve more, we need to expect more.

- **Nationally, 42%** of U.S. students in two-year colleges and **20%** of students in four-year colleges require remediation.^{viii}
- Fewer than a quarter (**22%**) of students who enter public colleges in Alaska earn their degrees.
- **34%** of employers deem the preparation of newly hired employees with only a high school diploma as "deficient," (and only 16% find their preparation "excellent.")^{ix}
- **49%** of employers surveyed noted they anticipate requiring higher levels of education for most jobs – and another **60%** noted more specific technical skills will be required – in the next 3-5 years.^x

All too often, students regret not working harder once they leave high school.^{xi}

Alaska's College- and Career-Ready Commitment

The College- and Career-Ready Agenda

Over the past five years, states have driven the college- and career-ready agenda – a policy agenda that seeks to ensure all students graduate high school, and graduate ready for their next steps.

Alaska is among the states that have made college and career readiness a priority for all students.^{xii}

- In 2012, Alaska adopted college- and career-ready standards, aligned with the Common Core State Standards (CCSS), in mathematics and English Language Arts/Literacy.
- Alaska currently administers the WorkKeys assessment to all students as part of their high school assessment system.

Alaska is the only state in the nation that administers the WorkKeys to all students and has adopted state hiring policies that incorporate use of the WorkKeys exams.

- Alaska has met four of the ten State Actions identified by the Data Quality Campaign, providing a foundation for strong and sound student-level data collection and use.

Alaska is one of 26 states with a P-20 longitudinal data system that regularly matches student-level K-12 and postsecondary data.

- While Alaska's data system is capable of collecting a variety of college- and career-ready student data, the state needs to make use of a range of indicators in a variety of ways to get a more complete picture of how their students are faring in K-12 and beyond.

College- and Career-Ready Indicator	Publicly Reported	State Set Goal	Incentive to Improve	Accountability Formula
CCR Diploma				
CCR Assessment				
Postsecondary Remediation				
Exceeding CCR				

How Alaska Can Further Advance the College- and Career-Ready Agenda

- ✓ ...Fully realize the promise of the college- and career-ready standards by implementing them fully and successfully, taking into account the related curricular, professional development, and policy changes.
- ✓ ...Adopt college- and career-ready graduation requirements, aligned to the college- and career-ready standards, to ensure all students are prepared and eligible for entry into college and skilled careers.
- ✓ ...Administer assessments to all high school students, aligned to the college- and career-ready standards, which can be used by higher education institutions to make placement decisions for credit-bearing courses.
- ✓ ...Continue to make progress on the state's data collection efforts, particularly around making student data available to relevant stakeholders, such as teachers, parents and counselors.
- ✓ ...Re-examine the state's K-12 accountability system to determine how it can reward measures of college and career readiness.
