

While education serves many purposes, an academically-prepared workforce is more important than ever before to a state’s (and our nation’s) economy. The level of education demanded by today’s jobs, especially in the growing fields of science, technology, engineering, and mathematics (STEM), exceeds the supply of available workers. Attaining postsecondary credentials requires a rigorous K-12 academic foundation.

**THE ECONOMIC IMPERATIVE ..... 2**

High school graduation rates are increasing, but a high school diploma does not necessarily signify college and career readiness. Too few students graduate academically prepared for postsecondary success, as demonstrated by performance on college readiness assessments and/or completion of a rigorous core high school curriculum. Worse, indicators of students’ access to and performance in high school courses that would better prepare them for college and career are often not tracked by states.

**COLLEGE- AND CAREER-READY ASSESSMENT SCORE ..... 4**

**STUDENTS ON TRACK TO GRADUATE BASED ON CREDIT ACCUMULATION..... 6**

**ADJUSTED COHORT GRADUATION RATES..... 7**

**COLLEGE- AND CAREER-READY COURSEWORK COMPLETION ..... 8**

**EARNING COLLEGE CREDIT WHILE IN HIGH SCHOOL ..... 9**

Graduates and their families believe that a high school diploma signifies that they have the skills and knowledge necessary to get additional training, join the military, or enroll in entry-level, credit-bearing courses in two- and four-year colleges. Indicators show, however, that many high school graduates are not college or career ready.

**PREPAREDNESS FOR THE MILITARY ..... 10**

**POSTSECONDARY ENROLLMENT ..... 10**

**POSTSECONDARY REMEDIATION..... 11**

**POSTSECONDARY PERSISTENCE ..... 11**

Students begin to fall “off track” well before ninth grade. The National Assessment of Education Progress is the only national, comparable data showing U.S. student performance in 4th and 8th grade prior to entering high school.

**ACADEMIC PERFORMANCE OF ELEMENTARY AND MIDDLE SCHOOL STUDENTS ..... 12**

# THE ECONOMIC IMPERATIVE

In today's knowledge-based economy, more jobs than ever require a postsecondary credential. Too often, though, the demand for educated workers outstrips the supply. The increasing demand for science, technology, engineering, and mathematics (STEM) jobs may, in part, explain the demand for workers to be more educated than ever before.

The economic indicators below show the importance of an educated workforce and the economic imperative for improving K-12 education so that all students graduate with a high school diploma that prepares them for college, careers, and life.

## SUPPLY VS. DEMAND - DOES INDIANA HAVE THE EDUCATED WORKFORCE NEEDED FOR TODAY'S JOBS?

As policymakers and leaders work to improve employment prospects for their workforce, it's important to take into account the education required for available jobs. The graph below provides a snapshot comparison of the supply of educated workers and the demand for education credentials within the current job market.

\* 2013 American Community Survey data.

\*\* Burning Glass Technologies job posting data, July 2014–June 2015.

## COMPOSITION OF INDIANA'S JOB MARKET

Jobs in STEM<sup>1</sup> fields are increasingly important to every state's economy. The graphs below demonstrate that STEM jobs represent a significant portion of the state's current job market, as well as the fact that STEM jobs are more likely than non-STEM jobs to require a bachelor's degree or more.

### STEM and Non-STEM Jobs\*

## EDUCATION REQUIREMENTS FOR INDIANA'S JOBS

As the STEM job market continues to grow, a rigorous K-12 education with a strong academic foundation and experiences that position them for successful transitions to the additional education and training needed for their selected career path.

### STEM and Non-STEM Jobs\*

<sup>1</sup> Definition of STEM jobs: The analysis takes a job seeker- and student-centric approach to defining STEM occupations and defines STEM jobs as those that have substantial mathematics and science requirements included within either the standard course of training or the specific qualifications requested in job postings. As a result, "STEM jobs" includes the following occupational areas: science, information technology, engineering, mathematics, and health care.

This approach contrasts with traditional methodologies, which tend to focus only on jobs that are primarily engaged in scientific, mathematical, or technological activity. Examples of jobs that are included in this analysis that are typically excluded from STEM jobs definitions: clinical health care roles that require job seekers to undertake substantial coursework in the biological sciences and a range of "analyst" jobs (such as logistics analysts and business intelligence analysts) that call for significant mathematics training.

\* Burning Glass Technologies job posting data, July 2014–June 2015.

# COLLEGE- AND CAREER-READY ASSESSMENT SCORE

This indicator reports the percentage of students who score at the college- and career-ready level on high school assessments anchored to college- and career-ready standards. These assessments include a performance level/cut score that provides high school students a clear signal regarding their readiness for first-year mathematics and English courses at postsecondary institutions and is used by colleges and universities for placement into first-year credit-bearing courses.

## ACT PERFORMANCE: PERCENTAGE OF STUDENTS MEETING COLLEGE READINESS BENCHMARKS

ACT reports the percentage of ACT-tested high school graduates meeting ACT's College Readiness Benchmarks for each subject area as well as across the four subject areas. These data reflect the performance of both public and non-public school students. These data are available for some but not all subgroups. All students in the cohort took the test, but ACT's participation rate is based upon projections of graduates made by the Western Interstate Commission for Higher Education (WICHE) in 2012 rather than actual graduates.

### Percentage Meeting All College Readiness Benchmarks in 2015-16

Participation Rate: 41%

All Students		35%
American Indian/Alaska Native		16%
Asian		52%
Black		8%
Hispanic		18%
Native Hawaiian/Other Pacific Islander		28%
White		40%
Two or More Races		26%
Low Income		N/R
Students with Disabilities		N/R
Limited English Proficient		N/R

### Percentage Meeting College Readiness Benchmarks in 2015-16 by Subject

	READING	ENGLISH	MATH	SCIENCE
All Students	 56%	 72%	 53%	 46%
American Indian/Alaska Native	 39%	 59%	 40%	 26%
Asian	 64%	 80%	 75%	 62%
Black	 23%	 37%	 17%	 13%
Hispanic	 41%	 57%	 35%	 29%
Native Hawaiian/Other Pacific Islander	 44%	 61%	 56%	 33%
White	 62%	 79%	 60%	 52%
Two or More Races	 47%	 65%	 41%	 38%
Low Income	 N/R	 N/R	 N/R	 N/R
Students with Disabilities	 N/R	 N/R	 N/R	 N/R
Limited English Proficient	 N/R	 N/R	 N/R	 N/R

## SAT PERFORMANCE: PERCENTAGE OF STUDENTS MEETING COLLEGE READINESS BENCHMARK

The state did not report 2015-16 data on the percentage of students in the cohort taking the SAT and meeting the Evidence-Based Reading and Writing (EBRW) and Mathematics Benchmarks. College Board did not report state data on the percentage of the 2016 graduating cohort meeting the benchmarks due to the March 2016 transition from the old SAT to the redesigned SAT. The College Board advises against comparing SAT results for the class of 2016 to previous graduating cohorts because the total population of students is defined differently.

### Percentage Meeting College Readiness Benchmarks in 2015-16 by Subject

	EBRW		MATH	
	Percentage	Label	Percentage	Label
Participation Rate: N/R				
All Students		N/R		N/R
American Indian/Alaska Native		N/R		N/R
Asian		N/R		N/R
Black		N/R		N/R
Hispanic		N/R		N/R
Native Hawaiian/Other Pacific Islander		N/R		N/R
White		N/R		N/R
Two or More Races		N/R		N/R
Low Income		N/R		N/R
Students with Disabilities		N/R		N/R
Limited English Proficient		N/R		N/R

# STUDENTS ON TRACK TO GRADUATE BASED ON CREDIT ACCUMULATION

Timely credit accumulation is a leading indicator of students' progress toward high school graduation. This indicator shows the percentage of students who are on track to graduate based on the number of credits earned by the end of a particular grade.

**Percent of grade 9 students on track to graduate**

All Students		N/R
American Indian/Alaska Native		N/R
Asian		N/R
Black		N/R
Hispanic		N/R
Native Hawaiian/Other Pacific Islander		N/R
White		N/R
Two or More Races		N/R
Low Income		N/R
Students with Disabilities		N/R
Limited English Proficient		N/R

Students on track to graduate is reported as N/R because either Indiana does not report the data or the reporting does not meet Achieve's criteria for this indicator.

# ADJUSTED COHORT GRADUATION RATES

The adjusted cohort graduation rate indicates the percentage of 9th graders who graduate from high school in four years or less with a regular high school diploma. This percentage is calculated by dividing the number of graduating students by the number of students who entered high school four years earlier (adjusting for transfers in and out, émigrés, and deceased students). Five-year graduation rates are also reported where available.

	4-YEAR	5-YEAR	CLASS OF 2013-14	CLASS OF 2014-15
All Students			90%	89%
			91%	N/R
American Indian/Alaska Native			86%	87%
			89%	N/R
Asian			92%	94%
			94%	N/R
Black			80%	79%
			81%	N/R
Hispanic			86%	86%
			88%	N/R
Native Hawaiian/Other Pacific Islander			85%	89%
			94%	N/R
White			92%	91%
			93%	N/R
Two or More Races			88%	86%
			89%	N/R
Low Income			87%	85%
			88%	N/R
Students with Disabilities			75%	72%
			77%	N/R
Limited English Proficient			82%	80%
			85%	N/R

Indiana regularly reports 5-year graduation rates, but due to a lag in reporting, the 5-year graduation rate data for the Class of 2014-15 were not yet available at the time of this report's release.

# COLLEGE- AND CAREER-READY COURSEWORK COMPLETION

Graduation rate alone is often an insufficient indicator of students' readiness for life after high school because the classes and requirements to earn a diploma vary greatly across states. Every state, regardless of its graduation requirements, can and should also publicly report the percentage of the adjusted 9th grade cohort who complete a college- and career-ready course of study while in high school.

Indiana expects all students to complete a college- and career-ready course of study and publicly reports the percentage of students who graduate having completed that course of study, including by subgroups.

# EARNING COLLEGE CREDITS WHILE IN HIGH SCHOOL

Students who earn college credits while in high school are more likely to enter college and succeed. This indicator reports the percentage of students that meet this benchmark.

## PERCENTAGE OF STUDENTS EARNING A 3+ ON AN AP EXAM

Indiana reports the percentage of high school graduates in 2013, 2014, and 2015 who scored a 3+ on an Advanced Placement (AP) exam. The state reports data for some but not all subgroups for graduates in 2015.

### Trend Over Time

All Students	17%
American Indian/Alaska Native	13%
Asian	42%
Black	5%
Hispanic	12%
Native Hawaiian/Other Pacific Islander	21%
White	19%
Two or More Races	14%
Low Income	8%
Students with Disabilities	N/R
Limited English Proficient	N/R

## PERCENTAGE OF STUDENTS WHO HAVE COMPLETED COURSES FOR COLLEGE CREDIT

Indiana reports the percentage of graduates who earned AP exam credit and/or dual credit awarded by an Indiana public college. The state also reports the total number of International Baccalaureate (IB) tests scored 4+ in 2011.

Completed IB/Earned College Credit

Completed Dual Enrollment Courses for College Credit

Met AP, IB, Dual Enrollment or Career-Technical Indicator

## PREPAREDNESS FOR THE MILITARY

This indicator examines data from the U.S. Armed Forces enlistment examination and reveals the percentage of students who seek to enter the military but are not eligible to enter or are not prepared for higher-level education, training, and advancement opportunities offered by the U.S. Armed Forces.

### Percentage Ineligible

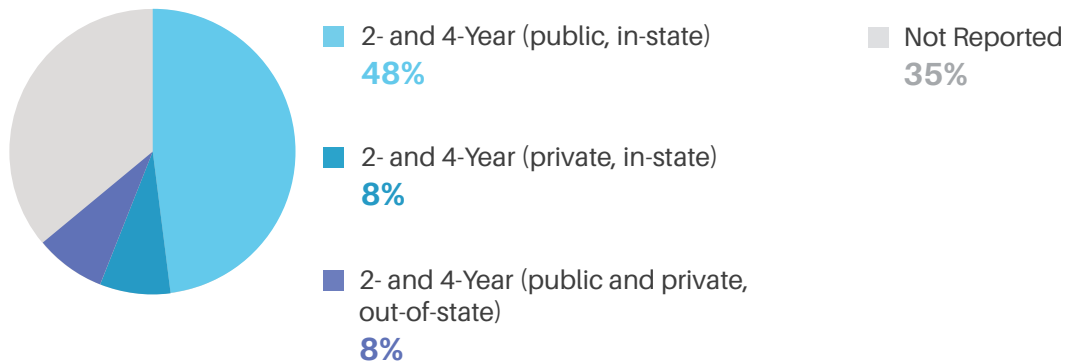

## POSTSECONDARY ENROLLMENT

Enrollment in a postsecondary institution is the first step to degree attainment. This indicator reports the percentage of the state’s high school graduates who enter into postsecondary education. The extent of information reported varies based on whether data are available for in-state and out-of-state students along with whether data are available for two-year institutions, four-year institutions, or both.

### PERCENTAGE OF STUDENTS ENROLLING IN POSTSECONDARY

Indiana reports the percentage of high school graduates enrolling in two- and four-year, in- and out-of-state, public and private institutions of higher education the fall following graduation.

### High School Graduates, Class of 2014

## POSTSECONDARY REMEDIATION

Alarming numbers of students enter postsecondary institutions only to find out they need to enroll in — and pay for — remedial courses without earning college credit for these classes. This indicator reports the percentage of high school graduates who require postsecondary remediation.

### PERCENTAGE OF STUDENTS IN REMEDIATION

Indiana reports the percentage of the state’s class of 2014 high school graduates attending the state’s two- and four-year institutions who enroll in math, English, or any remedial courses. These data reflect both full- and part-time attendees.

#### Remediation by Institution Type and Subject Area

## POSTSECONDARY PERSISTENCE

Too few students who start college ultimately earn a degree. This indicator reports the percentage of the state’s high school graduates who enroll in a postsecondary institution and complete at least one year of postsecondary education in a designated amount of time or return to postsecondary education for a consecutive year.

### PERCENTAGE OF STUDENTS PERSISTING BEYOND THE FIRST YEAR

Indiana reports the percentage of 2013 high school graduates who enrolled in an Indiana public college in FY2014 and were still enrolled in an Indiana public college in FY2015. This excludes any students enrolled in private and out-of-state institutions.

#### High School Graduates, Class of 2013

2-Year (public, in-state)

4-Year (public, in-state)

# ACADEMIC PERFORMANCE OF ELEMENTARY AND MIDDLE SCHOOL STUDENTS

The National Assessment of Educational Progress (NAEP) monitors student achievement nationally and allows for comparisons across states. This indicator includes 4th and 8th grade reading and math results and 8th grade science results. Scale scores were rounded to the nearest whole number. Changes since 2005 were calculated based on differences between unrounded scale scores and then rounded to the nearest whole number.

## GRADE 4

### Percentage of Students Meeting Proficient or Advanced Benchmarks

	MATH - 2015	READING - 2015
All Students	50%	40%
American Indian/Alaska Native	N/R	N/R
Asian	N/R	N/R
Black	22%	22%
Hispanic	35%	29%
Native Hawaiian/Other Pacific Islander	N/R	N/R
White	57%	44%
Two or More Races	45%	40%
National School Lunch Program Eligible	36%	28%

### Average Scale Score Changes - Math

#### Scale Score Change from 2005-2015

Change since 2005: ▲ 8

#### Change in Gaps: 2005-2015

Black-White	<span style="color: green;">▼ 1</span>
