Ohio's College- and Career-Ready Commitment

The Economic Imperative

Today, nearly every good job requires some postsecondary education and/or training (e.g., an associate's or bachelor's degree, certificate, or apprenticeship or significant on-the-job training). All students need to be academically prepared to compete for good jobs in the global economy.

In 1950, 60% of jobs were classified as unskilled, attainable by young people with high school diplomas or less. Today, less than 20% jobs are considered to be unskilled.

- 79% of Ohio's jobs are middle or high skills (jobs that require some postsecondary education or training).
- Yet only 36% of Ohio's adults have some postsecondary degree (associate's or higher).

More education is associated with higher earnings and higher rates of employment in Ohio. iii

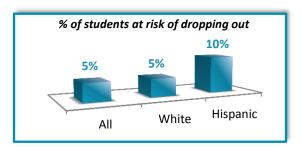

Mean Income	Education Level	Unemployment
\$9,983	HS Dropout	20%
\$26,042	HS Graduate	11%
\$29,547	Some College	9%
\$57,978	Bachelors & Above	5%

The Equity Imperative

Far too many students drop out or graduate from high school unprepared for success, closing doors and limiting their options and opportunities – in particular minority and low-income students.

Ohio's achievement gaps begin in the earliest grades and extend through college enrollment and admissions. iv

	All	White	Black	Hispanic	Low SES
4 th Grade Math Proficiency	45%	53%	20%	27%	30%
8 th Grade Reading Proficiency ^v	37%	43%	14%	17%	21%
HS Graduation Rate ^{vi}	60%	62%	46%	45%	N/A
College Completion Rate ^{vii}	55%	58%	33%	47%	N/A

The Expectations Gap

The bar has been set too low for too long, keeping students from reaching their full potential. If we want students to achieve more, we need to expect more.

- 39% of Ohio's students in two- and four-year colleges require remediation upon enrollment.
- A little over half (55%) of students who enter public colleges in Ohio earn their degrees.
- 34% of employers deem the preparation of newly hired employees with only a high school diploma as "deficient," (and only 16% find their preparation "excellent.") ix
- 49% of employers surveyed noted they anticipate requiring higher levels of education for most jobs – and another 60% noted more specific technical skills will be required – in the next 3-5 years.^x

All too often, students regret not working harder once they leave high school. xi

Ohio's College- and Career-Ready Commitment

The College- and Career-Ready Agenda

Over the past five years, states have driven the collegeand career-ready agenda – a policy agenda that seeks to ensure all students graduate high school, and graduate ready for their next steps.

Ohio is among the states that have made college and career readiness a priority for all students. xii

- In 2007, Ohio adopted high school academic standards aligned with college- and career-ready expectations.
- In June 2010, Ohio adopted the Common Core State Standards.
- Ohio is a Lead State Partner in the development of the Next Generation Science Standards.
- In 2007, Ohio adopted college- and career-ready graduation requirements – the Ohio Core – for all students. These requirements will first take effect for the Class 2014.

Ohio is one of only 24 states (including DC) with requirements at this level

- Ohio is a Governing State in the Partnership for Assessment of Readiness for College and Careers (PARCC), a consortium of states working to develop a common assessment system using Race to the Top Common Assessment funds.
- Ohio has met seven of the ten State Actions identified by the Data Quality Campaign, providing a foundation for strong and sound student-level data collection and use.
- Ohio collects and uses indicators of college and career readiness, but will need to expand its range of indicators to get a more complete picture of how their students are faring in K-12 and beyond.

College- and Career-Ready Indicator	Publicly Reported	State Set Goal	Incentive to Improve	Account- ability Formula
CCR Diploma	YES			
CCR Assessment				
Postsecondary	YES			
Remediation	163			
Exceeding CCR				

How Ohio Can Further Advance the College- and Career-Ready Agenda

- ...Fully realize the promise of the college- and careerready standards by implementing them fully and successfully, taking into account the related curricular, professional development, and policy changes.
- ...Closely monitor which students are completing the college- and career-ready curriculum, and which are opting out.
- ...Remain committed to the goals of PARCC and developing and administering a next-generation, computer-based assessment system anchored by college- and career-ready tests in high school that will let students know if they are ready for college-level coursework and measure the full range of the Common Core State Standards
- ...Continue to make progress on the state's data collection efforts, particularly around making student data available to relevant stakeholders and linking K-12 and postsecondary student-level data.
- ...Re-examine the state's K-12 accountability system to determine how it can reward measures of college and career readiness, in alignment with the state's standards and course requirements.
