

# OKLAHOMA'S COLLEGE- AND CAREER-READY COMMITMENT

## Why Is Oklahoma's Commitment To College and Career Readiness So Critical?

### A HIGH SCHOOL DIPLOMA IS NO LONGER ENOUGH FOR SUCCESS

*Today, nearly every good job requires some postsecondary education and/or training – such as an associates or bachelors degree, certificate, license, or completion of an apprenticeship or significant on-the-job training.*

In 1950, 60% of jobs were classified as unskilled, attainable by young people with high school diplomas or less. Today, less than 20% jobs are considered to be unskilled.<sup>i</sup>

*One result:* The demand for middle- and high-skilled workers is outpacing the state's supply of workers educated and experienced at that level.

- 80% of Oklahoma's jobs are middle- or high-skill (jobs that require some postsecondary education or training).
- Yet only 32% of Oklahoma's adults have some postsecondary degree (associate's or higher).<sup>ii</sup>

### TOO MANY STUDENTS GRADUATE UNPREPARED FOR REAL WORLD CHALLENGES

*Currently, far too many students drop out or graduate from high school without the knowledge and skills required for success, closing doors and limiting their post-high school options.*

Oklahoma's graduation rate – both the state-reported and the independently-reported – demonstrates how the education system is not working for all students.

Graduation Rate (class of 2008)	State Reported <sup>iii</sup>	Independently Reported <sup>iv</sup>
	80%	70%

As of 2009, Oklahoma had 18 "dropout factories" or high schools that graduate 60 percent or less of their students.<sup>v</sup>

Far too many students enter two- and four-year postsecondary institutions unprepared for college-level coursework.

### Oklahoma's Remediation Data

34% of the Oklahoma high school graduates who enroll in the state's public regional universities and 50% of Oklahoma's high school graduates who enroll in community colleges require remediation.<sup>vi</sup>

Employers of graduates entering into the workforce directly after high school note gaps in their knowledge and skills:

- 41% of employers are dissatisfied with graduates' abilities.
- Only 18% believe that new graduates, with no further education beyond high school, have the skills necessary for advancement.<sup>vii</sup>

### THE COLLEGE- AND CAREER-READY AGENDA

*The best way to prepare students for life after high school is to ensure they graduate with a strong foundation in the core academic areas that will leave all doors open in the future.*

Over the past five years, states have driven the college- and career-ready agenda – a policy agenda that seeks to ensure all students graduate high school, and graduate ready for their next steps.

The momentum created by the states has been bolstered by the federal government's Race to the Top competition, which has further incentivized the adoption of common, college- and career-ready standards and assessments.

Support is very strong among voters for college- and career-ready policies, across demographic and party lines:

- 89% of voters agree that "to really get ahead in life a person needs at least some education beyond high school, whether that means university, community college, technical or vocational school."<sup>viii</sup>
- 83% of voters believe all students should "be pushed to take rigorous and broad academic requirements in high school to make sure they have as many options as possible upon graduation."<sup>viii</sup>

# OKLAHOMA'S COLLEGE- AND CAREER-READY COMMITMENT

## What Oklahoma Has Accomplished To Date<sup>ix</sup>

- In 2007 Oklahoma adopted K-12 academic standards in math and English aligned with college- and career-ready expectations.
- Oklahoma adopted the Common Core State Standards in June 2010.
- In 2006 Oklahoma raised their high school graduation requirements to the college- and career-ready level.

**Oklahoma is one of only 21 states (including DC) with requirements at this level**

- Oklahoma is a Governing State in the Partnership for Assessment of Readiness for College and Careers (PARCC), a consortium of states working to develop a common assessment system using Race to the Top Common Assessment funds.
- Oklahoma's longitudinal data system satisfies nine of the ten essential Data Quality Campaign elements, providing a foundation for strong and sound student-level data collection

**Oklahoma is one of 22 states with a P-20 longitudinal data system that regularly matches student-level K-12 and postsecondary data**

- While Oklahoma does not have an accountability system that fully incorporates the full range of college- and career-ready indicators, the state does utilize a number of critical indicators in their reporting and accountability systems.

College- and Career-Ready Indicator	Publicly Reported	State Set Goal	Incentive to Improve	Accountability Formula
CCR Diploma	YES			
CCR Testing				YES
Postsecondary Remediation	YES			YES
Exceeding CCR			YES	YES

## How Oklahoma Can Further Advance the College- and Career-Ready Agenda

- ✓ ...Realize the promise of the Common Core State Standards by implementing them fully and successfully, taking into consideration the related curricular and policy changes.
- ✓ ...Remain committed to the goals of PARCC and developing a next-generation, computer-based assessment system anchored by college- and career-ready tests in high school that will let students know if they are ready for college-level coursework and measure the full range of the Common Core State Standards.
- ✓ ...Continue to make progress on the state's data collection efforts, particularly around making student data available to relevant stakeholders, such as teachers, parents and counselors.
- ✓ ...Re-examine the state's K-12 accountability system to determine how it can better reward measures of college and career readiness, in alignment with the state's standards, course requirements and assessments.
