

# South Dakota's College- and Career-Ready Commitment

## The Economic Imperative

Today, nearly every good job requires some postsecondary education and/or training (e.g., an associate's or bachelor's degree, certificate, or apprenticeship or significant on-the-job training). All students need to be academically prepared to compete for good jobs in the global economy.

In 1950, 60% of jobs were classified as unskilled, attainable by young people with high school diplomas or less. Today, less than 20% jobs are considered to be unskilled.<sup>i</sup>

- **81%** of the U.S. jobs are middle or high skills (i.e., require some postsecondary education or training).
- Yet only **41%** of South Dakota's adults have some postsecondary degree (associate's or higher).<sup>ii</sup>

More education is associated with higher earnings and higher rates of employment in South Dakota.<sup>iii</sup>

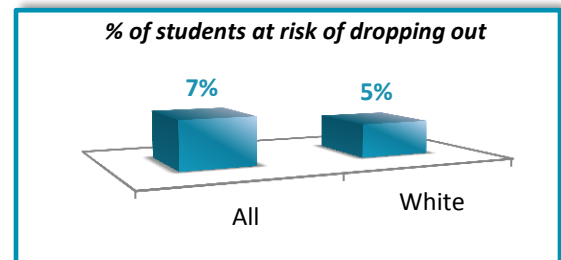

Mean Income	Education Level	Unemployment
\$10,502	HS Dropout	13%
\$25,892	HS Graduate	8%
\$31,022	Some College	6%
\$52,969	Bachelors & Above	3%

## The Equity Imperative

Far too many students drop out or graduate from high school unprepared for success, closing doors and limiting their options and opportunities – in particular minority and low-income students.

South Dakota's achievement gaps begin in the earliest grades and extend through college enrollment and admissions.<sup>iv</sup>

	All	White	Black	Hispanic	Low SES
4 <sup>th</sup> Grade Math Proficiency	40%	46%	21%	18%	25%
8 <sup>th</sup> Grade Reading Proficiency <sup>v</sup>	35%	39%	17%	22%	22%
HS Graduation Rate <sup>vi</sup>	70%	76%	66%	44%	N/A
College Completion Rate <sup>vii</sup>	45%	48%	14%	26%	N/A

## The Expectations Gap

The bar has been set too low for too long, keeping students from reaching their full potential. If we want students to achieve more, we need to expect more.

- **29%** of South Dakota's students entering the Regents System require remediation upon enrollment.<sup>viii</sup>
- Fewer than half (**45%**) of students who enter public colleges in South Dakota earn their degrees.
- **34%** of employers deem the preparation of newly hired employees with only a high school diploma as "deficient," (and only 16% find their preparation "excellent.")<sup>ix</sup>
- **49%** of employers surveyed noted they anticipate requiring higher levels of education for most jobs – and another **60%** noted more specific technical skills will be required – in the next 3-5 years.<sup>x</sup>

All too often, students regret not working harder once they leave high school.<sup>xi</sup>

# South Dakota's College- and Career-Ready Commitment

## The College- and Career-Ready Agenda

Over the past five years, states have driven the college- and career-ready agenda – a policy agenda that seeks to ensure all students graduate high school, and graduate ready for their next steps.

South Dakota is among the states that have made college and career readiness a priority for all students.<sup>xii</sup>

- South Dakota adopted the Common Core State Standards in July 2010.
- South Dakota is a Lead State Partner in the development of the Next Generation Science Standards.
- In 2005, South Dakota adopted the Advanced Diploma – a college- and career-ready curriculum – as the default graduation requirements for all students.

*South Dakota is one of only 24 states (including Washington, DC) with graduation requirements at this level*

- South Dakota is a governing state in the Smarter Balanced Assessment Consortium (SBAC), a group of states working to develop a common assessment system using Race to the Top Common Assessment funds.
- South Dakota meets only one of the ten State Actions identified by the Data Quality Campaign, but does meet nine of the ten of the Essential Elements, providing a strong foundation for student-level data collection.
- South Dakota does not track any indicators of college and career readiness and will need to expand its use of indicators to get a more complete picture of how their students are faring in K-12 and beyond.

College- and Career-Ready Indicator	Publicly Reported	State Set Goal	Incentive to Improve	Accountability Formula
CCR Diploma				
CCR Assessment				
Postsecondary Remediation				
Exceeding CCR				

## How South Dakota Can Further Advance the College- and Career-Ready Agenda

- ✓ ...Fully realize the promise of the Common Core State Standards by implementing them fully and successfully, taking into account the related curricular, professional development, and policy changes.
- ✓ ...Closely monitor which students are completing the college- and career-ready curriculum, and which are opting out.
- ✓ ...Remain committed to the goals of SBAC and developing and administering a next-generation, computer-based assessment system anchored by college- and career-ready tests in high school that will let students know if they are ready for college-level coursework and measure the full range of the CCSS.
- ✓ ...Continue to make progress on the state's data collection efforts, particularly around linking student-level K-12 and postsecondary data and making data available to relevant stakeholders, such as teachers, parents and counselors.
- ✓ ...Re-examine the state's K-12 accountability system to determine how it can reward measures of college and career readiness.
