

Kentucky's College- and Career-Ready Commitment

The Economic Imperative

Today, nearly every good job requires some postsecondary education and/or training (e.g., an associate's or bachelor's degree, certificate, or apprenticeship or significant on-the-job training). All students need to be academically prepared to compete for good jobs in the global economy.

In 1950, 60% of jobs were classified as unskilled, attainable by young people with high school diplomas or less. Today, less than 20% jobs are considered to be unskilled.ⁱ

- **81%** of Kentucky's jobs are middle or high skills (i.e., require some postsecondary education or training).
- Yet only **30%** of Kentucky's adults have some postsecondary degree (associate's or higher).ⁱⁱ

More education is associated with higher earnings and higher rates of employment in Kentucky.ⁱⁱⁱ

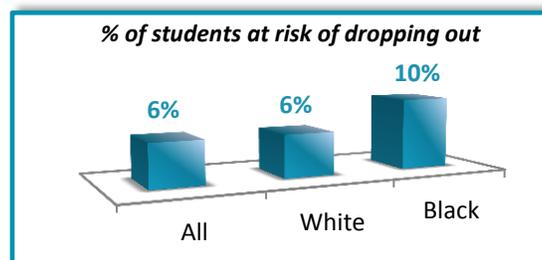

Mean Income	Education Level	Unemployment
\$11,007	HS Dropout	24%
\$23,589	HS Graduate	12%
\$28,352	Some College	6%
\$50,342	Bachelors & Above	6%

The Equity Imperative

Far too many students drop out or graduate from high school unprepared for success, closing doors and limiting their options and opportunities – in particular minority and low-income students.

Kentucky's achievement gaps begin in the earliest grades and extend through college enrollment and admissions.^{iv}

	All	White	Black	Hispanic	Low SES
4 th Grade Math Proficiency	39%	41%	17%	30%	26%
8 th Grade Reading Proficiency ^v	36%	39%	13%	30%	25%
HS Graduation Rate ^{vi}	71%	73%	54%	59%	N/A
College Completion Rate ^{vii}	47%	49%	37%	37%	N/A

The Expectations Gap

The bar has been set too low for too long, keeping students from reaching their full potential. If we want students to achieve more, we need to expect more.

- **78%** of Kentucky's students in two-year colleges and **34%** of Kentucky's students in four-year colleges require remediation.^{viii}
- Fewer than half of (**47%**) of students who enter public colleges in Kentucky earn their degrees.
- **34%** of employers deem the preparation of newly hired employees with only a high school diploma as "deficient," (and only 16% find their preparation "excellent.")^{ix}
- **49%** of employers surveyed noted they anticipate requiring higher levels of education for most jobs – and another **60%** noted more specific technical skills will be required – in the next 3-5 years.^x

All too often, students regret not working harder once they leave high school.^{xi}

Kentucky's College- and Career-Ready Commitment

The College- and Career-Ready Agenda

Over the past five years, states have driven the college- and career-ready agenda – a policy agenda that seeks to ensure all students graduate high school, and graduate ready for their next steps.

Kentucky is among the states that have made college and career readiness a priority for all students.^{xii}

- Kentucky adopted the Common Core State Standards in August 2010. Kentucky is a Lead State Partner in the development of the Next Generation Science Standards.
- In 2006, Kentucky raised their minimum high school requirements to the college- and career-ready level.

Kentucky is one of only 24 states (including Washington DC) with graduation requirements at this level

- Kentucky administers the ACT to all 11th grade students.

Kentucky is one of only 18 states with high school tests used by higher education for placement decisions letting students know if they are ready for college-level coursework while still in high school to give them time to address any readiness gaps

- Kentucky is a participating state in the Partnership for Assessment of Readiness for College and Careers (PARCC), a group of states working to develop a common assessment system using Race to the Top Common Assessment funds.
- Kentucky meets only two of the ten State Actions identified by the Data Quality Campaign, but does meet all ten of the Essential Elements, providing a strong foundation for student-level data collection.
- Kentucky tracks and uses all four indicators of college and career readiness, and partially has a reporting and accountability system that values college and career readiness for all students.

College- and Career-Ready Indicator	Publicly Reported	State Set Goal	Incentive to Improve	Accountability Formula
CCR Diploma	YES	YES		YES
CCR Assessment	YES			YES
Postsecondary Remediation	YES	YES		
Exceeding CCR		YES		

How Kentucky Can Further Advance the College- and Career-Ready Agenda

- ✓ ...Fully realize the promise of the Common Core State Standards by implementing them fully and successfully, taking into account the related curricular, professional development, and policy changes.
- ✓ ...Closely monitor which students are completing the college- and career-ready curriculum, and which are opting out.
- ✓ ...Remain committed to the goals of PARCC and developing and administering a next-generation, computer-based assessment system anchored by college- and career-ready tests in high school that will let students know if they are ready for college-level coursework and measure the full range of the CCSS.
- ✓ ...Continue to make progress on the state's data collection efforts, particularly around making data available to relevant stakeholders, such as teachers, parents and counselors.
- ✓ ...Re-examine the state's K-12 accountability system to determine how it can further reward measures of college and career readiness.
