## The State of American High School Graduates: What States Know (and Don't) About Student Performance

Achieve's annual report on college and career readiness - consisting of [51 individual state profiles](#) and a cross-state comparison report - is now available online. It shows that far too few states report data on indicators of college and career readiness - making it difficult for states to make good policy and practice decisions, and ultimately to improve student performance. Some states have made progress since last year in their public reporting, but there are still widespread disparities across states that are applicable to nearly all college and career readiness indicators.

### *Destination Known: Valuing College AND Career Readiness in State Accountability Systems*

A new report from the Council of Chief State School Officers (CCSSO) and Education Strategy Group details a set of recommendations intended to support states as they develop accountability systems that value college and career readiness. The report recommends that states consider including in their accountability systems progress

toward post-high school credential; co-curricular learning and leadership experiences; assessment of readiness; and transitions beyond high school.
