

# Michigan's College- and Career-Ready Commitment

## The Economic Imperative

Today, nearly every good job requires some postsecondary education and/or training (e.g., an associate's or bachelor's degree, certificate, or apprenticeship or significant on-the-job training). All students need to be academically prepared to compete for good jobs in the global economy.

In 1950, 60% of jobs were classified as unskilled, attainable by young people with high school diplomas or less. Today, less than 20% jobs are considered to be unskilled.<sup>i</sup>

- **80%** of Michigan's jobs are middle or high skills (i.e., require some postsecondary education or training).
- **Yet only 36%** of Michigan's adults have some postsecondary degree (associate's or higher).<sup>ii</sup>

More education is associated with higher earnings and higher rates of employment in Michigan.<sup>iii</sup>

| Mean Income | Education Level   | Unemployment |
|-------------|-------------------|--------------|
| \$8,428     | HS Dropout        | 22%          |
| \$23,729    | HS Graduate       | 16%          |
| \$27,165    | Some College      | 11%          |
| \$59,264    | Bachelors & Above | 4%           |

## The Equity Imperative

Far too many students drop out or graduate from high school unprepared for success, closing doors and limiting their options and opportunities – in particular minority and low-income students.

Michigan's achievement gaps begin in the earliest grades and extend through college enrollment and admissions.<sup>iv</sup>

|  | All | White | Black | Hispanic | Low SES |
|--|-----|-------|-------|----------|---------|
| 4 <sup>th</sup> Grade Math Proficiency                 | 35% | 41%   | 8%    | 21%      | 18%     |
| 8 <sup>th</sup> Grade Reading Proficiency <sup>v</sup> | 32% | 36%   | 11%   | 26%      | 19%     |
| HS Graduation Rate <sup>vi</sup>                       | 74% | 80%   | N/A   | 44%      | N/A     |
| College Completion Rate <sup>vii</sup>                 | 55% | 58%   | 32%   | 46%      | N/A     |

## The Expectations Gap

The bar has been set too low for too long, keeping students from reaching their full potential. If we want students to achieve more, we need to expect more.

- **22%** of Michigan's students in two-year colleges require remediation.<sup>viii</sup>
- A little over half of (**55%**) of students who enter public colleges in Michigan earn their degrees.
- **34%** of employers deem the preparation of newly hired employees with only a high school diploma as "deficient," (and only 16% find their preparation "excellent.")<sup>ix</sup>
- **49%** of employers surveyed noted they anticipate requiring higher levels of education for most jobs – and another **60%** noted more specific technical skills will be required – in the next 3-5 years.<sup>x</sup>

All too often, students regret not working harder once they leave high school.<sup>xi</sup>

# Michigan's College- and Career-Ready Commitment

## The College- and Career-Ready Agenda

Over the past five years, states have driven the college- and career-ready agenda – a policy agenda that seeks to ensure all students graduate high school, and graduate ready for their next steps.

Michigan is among the states that have made college and career readiness a priority for all students.<sup>xii</sup>

- Michigan adopted the Common Core State Standards in June 2010.
- Michigan is a Lead State Partner in the development of the Next Generation Science Standards.
- In 2006, Michigan aligned its high school graduation requirements with college- and career-ready expectations.

*Michigan is one of only 24 states (including Washington DC) with graduation requirements at this level*

- Michigan requires all students to take the ACT, along with sections of WorkKeys and state-developed tests, as part of its high school assessment system, the Michigan Merit Exam.

*Michigan is one of only 18 states with high school tests used by higher education for placement decisions letting students know if they are ready for college-level coursework while still in high school to give them time to address any readiness gaps*

- Michigan is a governing state in the Smarter Balanced Assessment Consortium (SBAC), a group of states working to develop a common assessment system using Race to the Top Common Assessment funds.
- Michigan has met seven of the ten State Actions identified by the Data Quality Campaign, providing a foundation for strong and sound student-level data collection and use.
- Michigan collects and uses only one indicator of college and career readiness, and will need to expand its range of indicators to get a more complete picture of how their students are faring in K-12 and beyond.

| College- and Career-Ready Indicator | Publicly Reported | State Set Goal | Incentive to Improve | Accountability Formula |
|-------------------------------------|-------------------|----------------|----------------------|------------------------|
| CCR Diploma                         |                   |                |                      |                        |
| CCR Assessment                      | <b>YES</b>        |                |                      |                        |
| Postsecondary Remediation           |                   |                |                      |                        |
| Exceeding CCR                       |                   |                |                      |                        |

## How Michigan Can Further Advance the College- and Career-Ready Agenda

- ✓ ...Fully realize the promise of the Common Core State Standards by implementing them fully and successfully, taking into account the related curricular, professional development, and policy changes.
- ✓ ...Closely monitor which students are completing the college- and career-ready curriculum, and which are opting out.
- ✓ ...Remain committed to the goals of SBAC and developing and administering a next-generation, computer-based assessment system anchored by college- and career-ready tests in high school that will let students know if they are ready for college-level coursework and measure the full range of the CCSS.
- ✓ ...Continue to make progress on the state's data collection efforts, particularly around making data available to relevant stakeholders, such as teachers, parents and counselors.
- ✓ ...Re-examine the state's K-12 accountability system to determine how it can further reward measures of college and career readiness, in alignment with the state's standards, graduation requirements, and assessments.
