

New Mexico's College- and Career-Ready Commitment

The Economic Imperative

Today, nearly every good job requires some postsecondary education and/or training (e.g., an associate's or bachelor's degree, certificate, or apprenticeship or significant on-the-job training). All students need to be academically prepared to compete for good jobs in the global economy.

In 1950, 60% of jobs were classified as unskilled, attainable by young people with high school diplomas or less. Today, less than 20% jobs are considered to be unskilled.ⁱ

- **77%** of New Mexico's jobs are middle or high skills (i.e., require some postsecondary education or training).
- Yet only **33%** of New Mexico's adults have some postsecondary degree (associate's or higher).ⁱⁱ

More education is associated with higher earnings and higher rates of employment in New Mexico.ⁱⁱⁱ

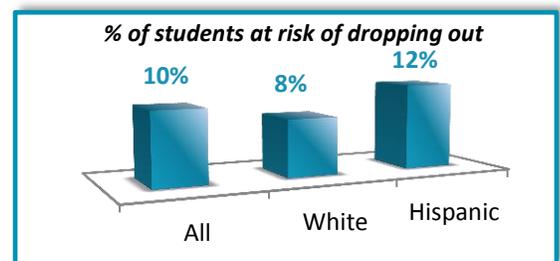

Mean Income	Education Level	Unemployment
\$12,398	HS Dropout	14%
\$26,043	HS Graduate	8%
\$26,036	Some College	6%
\$62,228	Bachelors & Above	5%

The Equity Imperative

Far too many students drop out or graduate from high school unprepared for success, closing doors and limiting their options and opportunities – in particular minority and low-income students.

New Mexico's achievement gaps begin in the earliest grades and extend through college enrollment and admissions.^{iv}

	All	White	Black	Hispanic	Low SES
4 th Grade Math Proficiency	30%	48%	19%	23%	21%
8 th Grade Reading Proficiency ^v	22%	36%	14%	16%	15%
HS Graduation Proficiency ^{vi}	59%	56%	36%	62%	N/A
College Completion Proficiency ^{vii}	42%	47%	38%	38%	N/A

The Expectations Gap

The bar has been set too low for too long, keeping students from reaching their full potential. If we want students to achieve more, we need to expect more.

- **47%** of New Mexico's students in two-year colleges and four-year colleges require remediation upon enrollment.^{viii}
- Fewer than (**42%**) of students who enter public colleges in New Mexico earn their degrees.
- **34%** of employers deem the preparation of newly hired employees with only a high school diploma as "deficient," (and only 16% find their preparation "excellent.")^{ix}
- **49%** of employers surveyed noted they anticipate requiring higher levels of education for most jobs – and another **60%** noted more specific technical skills will be required – in the next 3-5 years.^x

All too often, students regret not working harder once they leave high school.^{xi}

New Mexico's College- and Career-Ready Commitment

The College- and Career-Ready Agenda

Over the past five years, states have driven the college- and career-ready agenda – a policy agenda that seeks to ensure all students graduate high school, and graduate ready for their next steps.

New Mexico is among the states that have made college and career readiness a priority for all students.^{xii}

- In 2009, New Mexico first adopted high school standards aligned with college and career expectations.
- New Mexico adopted the Common Core State Standards in October 2010.
- In 2008, New Mexico adopted college- and career-ready graduation requirements – the New Mexico Diploma of Excellence – for all students.

New Mexico is one of 24 states (including DC) with graduation requirements at this level

- New Mexico is a Governing State in the Partnership for Assessment of Readiness for College and Careers (PARCC), a consortium of states working to develop a common assessment system using Race to the Top Common Assessment funds.
- New Mexico meets three of the ten State Actions identified by the Data Quality Campaign, as well as all ten of the Essential Elements, providing a strong foundation for student-level data collection.

New Mexico is one of 26 states with a P-20 longitudinal data system that regularly matches student-level K-12 and postsecondary data

- New Mexico tracks only one major indicator of college and career readiness and will need to expand its range of indicators to get a more complete picture of how their students are faring in K-12 and beyond.

College- and Career-Ready Indicator	Publicly Reported	State Set Goal	Incentive to Improve	Accountability Formula
CCR Diploma				
CCR Assessment				
Postsecondary Remediation	YES			
Exceeding CCR				

How New Mexico Can Further Advance the College- and Career-Ready Agenda

- ✓ ...Fully realize the promise of the Common Core State Standards by implementing them fully and successfully, taking into account the related curricular and policy changes.
- ✓ ...Closely monitor which students are completing the college- and career-ready curriculum, and which are opting out.
- ✓ ...Remain committed to the goals of PARCC and developing and administering a next-generation, computer-based assessment system anchored by college- and career-ready tests in high school that will let students know if they are ready for college-level coursework and measure the full range of the CCSS.
- ✓ ...Continue to make progress on the state's data collection efforts, particularly around making student data available to relevant stakeholders, such as teachers, parents and counselors.
- ✓ ...Re-examine the state's K-12 accountability system to determine how it can further reward measures of college and career readiness, in alignment with the state's standards and graduation requirements.
- ✓ ...Create feedback loops to monitor the efficacy and effectiveness of the college- and career-ready efforts.
