

Washington's College- and Career-Ready Commitment

The Economic Imperative

Today, nearly every good job requires some postsecondary education and/or training (e.g., an associate's or bachelor's degree, certificate, or apprenticeship or significant on-the-job training). All students need to be academically prepared to compete for good jobs in the global economy.

In 1950, 60% of jobs were classified as unskilled, attainable by young people with high school diplomas or less. Today, less than 20% jobs are considered to be unskilled.ⁱ

- **80%** of Washington's jobs are middle or high skills (or require some postsecondary education or training).
- **Only 43%** of Washington's adults have some postsecondary degree (associate's or higher).ⁱⁱ

More education is associated with higher earnings and higher rates of employment in Washington.ⁱⁱⁱ

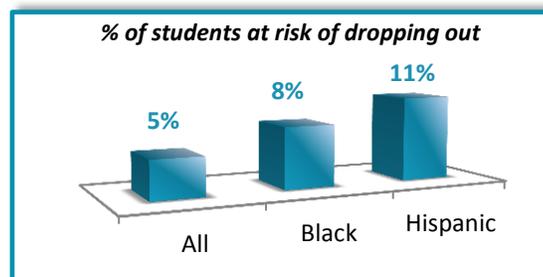

Mean Income	Education Level	Unemployment
\$9,923	HS Dropout	27%
\$28,053	HS Graduate	16%
\$33,415	Some College	9%
\$63,467	Bachelors & Above	6%

The Equity Imperative

Far too many students drop out or graduate from high school unprepared for success, closing doors and limiting their options and opportunities – in particular minority and low-income students.

Washington's achievement gaps begin in the earliest grades and extend through college enrollment and admissions.^{iv}

	All	White	Black	Hispanic	Low SES
4 th Grade Math Proficiency	45%	53%	20%	22%	24%
8 th Grade Reading Proficiency ^v	37%	42%	22%	17%	22%
HS Graduation Rate ^{vi}	68%	71%	49%	56%	N/A
College Completion Rate ^{vii}	63%	65%	47%	51%	N/A

The Expectations Gap

The bar has been set too low for too long, keeping students from reaching their full potential. If we want students to achieve more, we need to expect more.

- **11%** of Washington's students in two- and four-year colleges require remediation, including **32%** of students in mathematics.^{viii}
- About two-thirds (**63%**) of students who enter public colleges in Washington earn their degrees.
- **34%** of employers deem the preparation of newly hired employees with only a high school diploma as "deficient," (and only 16% find their preparation "excellent.")^{ix}
- **49%** of employers surveyed noted they anticipate requiring higher levels of education for most jobs – and another **60%** noted more specific technical skills will be required – in the next 3-5 years.^x

All too often, students regret not working harder once they leave high school.^{xi}

Washington's College- and Career-Ready Commitment

The College- and Career-Ready Agenda

Over the past five years, states have driven the college- and career-ready agenda – a policy agenda that seeks to ensure all students graduate high school, and graduate ready for their next steps.

Washington is among the states that have made college and career readiness a priority for all students.^{xii}

- In 2008, Washington adopted academic standards aligned with college- and career-ready expectations. Washington adopted the Common Core State Standards in 2011.
- Washington is a Lead State Partner in the development of the Next Generation Science Standards.
- Washington will require all students to complete a college- and career-ready curriculum in order to graduate, beginning with the class of 2016.

Washington is one of only 24 states (including DC) with requirements at this level

- Washington is a Governing State and the Fiscal Agent for the Smarter Balanced Assessment Consortium (SBAC), a group of states working to develop a common assessment system using Race to the Top Common Assessment funds.
- Washington has met five of the ten State Actions identified by the Data Quality Campaign, providing a foundation for strong and sound student-level data collection and use.

Washington is one of 26 states with a P-20 longitudinal data system that regularly matches student-level K-12 and postsecondary data

- While Washington's data system is capable of collecting a variety of college- and career-ready student data, the state needs to make use of a range of indicators in a variety of ways to get a more complete picture of how their students are faring in K-12 and beyond.

College- and Career-Ready Indicator	Publicly Reported	State Set Goal	Incentive to Improve	Accountability Formula
CCR Diploma				
CCR Assessment				
Postsecondary Remediation				
Exceeding CCR				

How Washington Can Further Advance the College- and Career-Ready Agenda

- ✓ ...Fully realize the promise of the Common Core State Standards by implementing them fully and successfully, and taking steps to ensure they fully reach every classroom across the state.
- ✓ ...Closely monitor which students are completing the college- and career-ready curriculum, and which are opting out.
- ✓ ...Remain committed to the goals of SBAC and developing and administering a next-generation, computer-based assessment system anchored by college- and career-ready tests in high school that will let students know if they are ready for college-level coursework and measure the full range of the Common Core State Standards.
- ✓ ...Continue to make progress on the state's K-12 accountability system to determine how it can further reward measures of college and career readiness, in alignment with the state's standards and course requirements.
- ✓ ...Focus efforts around increasing the state's graduation rate (and decreasing the dropout rate) through student support programs and partnerships with higher education.
